

**Question 1.5** How much time did you spend on these tasks? (hours)

I spent around 4 hours in this task.

The most difficult was to setup the environments in both google cloud and amazon cloud.

The web applications were easy to work on.

**Question 1.6** How useful is this task to your understanding of the GAE development and DynamoDB?  
(very useful, somewhat useful, not useful)

The project was quite interesting and it gave me insights into how to handle datastores. So I would say it was very useful.

**Question 3.1** Your level of interest in this lab exercise (high, average, low);

I was very interested in this lab.

**Question 3.2** How challenging is this lab exercise? (high, average, low);

This lab was highly challenging

**Question 3.3** How valuable is this lab as a part of the course (high, average, low);

This lab is highly valuable

**Question 3.4** Are the supporting materials and lectures helpful for you to finish the project? (very helpful, somewhat helpful, not helpful);

Yes the supporting materials are helpful in completing the project

**Question 3.5** Do you feel confident on applying the skills learned in the lab to handle other similar problems with the multi-cloud strategy? (high, average, low)

I have average confidence in these concepts.
